

Information about Financial Service <https://dbx.so/>: instruments and services

Trading and investing into Instruments (Fiat /Fiduciary money, used in transactions on <https://dbx.so/>) entail certain risk. The following information cannot disclose all the risks; other factors associated with the conduct of a trade, investing or participating in financing the Tools acquisition include, but are not limited to the following aspects.

1. Market risk. Market of Tools as objects for investment in the financial market is currently still a zone of uncertainty for its participants due to the lack of accumulated statistics, the ambiguous interpretation of the data assets at the legislative level, difficulties in accounting, taxation etc. Working with Tools may be associated with high price volatility, which means high risk of invested funds loss. Participants who have decided to work with Tools should be careful in carrying out operations on them.
2. Legal risk: the legal status of some Tools may also pose risks to their owners due to the lack of a clear legal framework to regulate their operation. However, Tools owners are responsible for making decisions about how to work with them based on knowledge and understanding that the tokens they own will be reviewed, regulated and taxed in accordance with the applicable law.
3. The risk of the transaction (counterparty risk): the availability of Tools for deposit or at the time of the purchase and sale transaction between the two interested parties has the risks. Such risks include security breaches, risk of contract breach and loss risk. The participants must be careful to carry out any transactions with third parties, assessing all possible risks of loss (partial loss) of their property in the form of Tool / Tools in connection with documentation, compliance with all the norms of civil law relations, tax consequences, etc.
4. Trading risk. In addition to liquidity risks, values of any token market are volatile and can change rapidly. Participants of any market working with Tools should remember that they should pay close attention to assessing the liquidity of these financial tools, as well as the financial condition and business reputation of those organizations with which they interact for the sale of Tools, since their condition directly affects the successful outcome of transactions with Tools.

5. Risks associated with the financing: when you, as an investor, make a decision to buy or sell a particular Tool based on obtaining funding for this asset, you should be aware of the possibility of not getting that kind of funding. Also, with the financing of trade, each party to such transaction assumes the risk of its imperfections due to inability to repay this funding (e.g., if the market price of the Tool falls). The participants should be aware of all the terms and conditions of any contracts concluded by them for planning and regulation of financial strategies, assessing all the factors and risks that may affect the financial result.
